

Shin-Etsu MicroSi Eclipses Milestone, 50 Millionth Thermal Interface Syringe Package Sold

Thermal grease syringes used for manual applications for reworks and repairs of microprocessors

Phoenix, AZ, May 17, 2016 –For over 18 years Shin-Etsu MicroSi has produced a convenient package to dispense and apply thermal grease material for the rework and repair of microprocessors. Today they are announcing that they have produced and shipped their 50 millionth package.

Shin-Etsu MicroSi's thermal grease syringes are ideal for manual applications of reworks or field repairs of CPUs, MPUs or GPUs. Pre-filled and weighed syringes assure a guaranteed shot weight (0.5 gm, 1.0 gm or 1.5 gm) when applied to the heat source. Shin-Etsu MicroSi's SQC processes provide a consistent dispense weight of thermal grease with each syringe.

The Syringe Delivery Method provides flexibility for an organization with the ability to utilize the same product package for production and field requirements without additional investment in application tools.

Shin-Etsu MicroSi is the only authorized supplier of Shin-Etsu grease in a syringe package. Recently, Shin-Etsu customers reported that counterfeit syringes were being sold. These unauthorized thermal interface materials claimed to be produced by Shin-Etsu. Neither Shin-Etsu Chemical nor Shin-Etsu MicroSi will be held liable for use of these unauthorized products.

The syringe package is available for all Shin-Etsu thermal grease products. Evaluation samples of these high-performance grease products may be requested for qualification efforts. Other bulk delivery packages are also available.

About Shin-Etsu MicroSi Shin-Etsu MicroSi Inc. is a wholly owned subsidiary of Shin-Etsu Chemical Co., Ltd. With headquarters in Phoenix, Arizona, Shin-Etsu MicroSi provides high performance products and materials, specifically designed to address today's photolithography, packaging, LED, and coatings requirements through its research, development and manufacturing. Founded as a General Electric subsidiary in 1984, Shin-Etsu MicroSi became part of the Shin-Etsu group in 1989. www.microsi.com
